Harry

FRONTEND DEVELOPER

Self-taught · 19 years old · Available for work honeycodes24@gmail.com

github.com/HoneyCode24 linkedin.com/in/honey-gupta

PROFILE

Self-taught frontend developer with a strong foundation in modern web technologies. I build fast, visually sharp, fully responsive web experiences from scratch — no templates, no shortcuts. At 19, I have already designed and deployed 6 real-world projects including a luxury restaurant website, an e-commerce storefront, a Netflix clone, and an admin dashboard. I combine technical precision with strong design intuition to deliver products that clients are proud to show.

TECHNICAL SKILLS

Core	HTML5, CSS3, JavaScript (ES6+)
Frameworks	React.js, Next.js 14, Tailwind CSS
Animation	Framer Motion, GSAP, CSS Animations, Parallax
Tools	Git, GitHub, VS Code, Figma, Vercel
Learning	Node.js, TypeScript, PostgreSQL, REST APIs

PROJECTS

MK·I Al Dente Gourmet Restaurant github.com/HoneyCode24/Restarurant-v2

Full luxury restaurant website with cinematic design, parallax scrolling, scroll-triggered animations, and a reservation system.

- Built entirely from scratch with no templates or frameworks — pure HTML, CSS, and JavaScript
- Implemented multi-layer parallax effect and GSAP-style scroll animations for premium feel
- Fully responsive across all screen sizes with mobile-first approach
- Deployed on Vercel with custom domain and live reservation form

Stack: HTML5, CSS3, JavaScript, Parallax, Vercel

MK·II Street Style E-Commerce Store github.com/HoneyCode24/StreetStyle-E-Com-Website

Full e-commerce storefront with product catalog, cart functionality, filters, and checkout UI.

- Built product listing, cart state management, and filter logic entirely in React
- Implemented responsive grid layout with smooth hover animations on product cards
- Clean component architecture with reusable UI components throughout

Stack: React, CSS Modules, JavaScript, Vercel

MK·III QuickBite Food Delivery App github.com/HoneyCode24/Food-delivery

Modern food delivery landing page with restaurant browsing, menu sections, and order flow UI.

- Designed and built a multi-section landing page with animated hero and menu cards
- Used Tailwind CSS utility classes for rapid, consistent styling throughout
- Mobile-first responsive design with smooth scroll and section transitions

Stack: React, Tailwind CSS, JavaScript, Vercel

MK·IV Admin Control Panel Dashboard github.com/HoneyCode24/Admin-Dashboard

Full admin dashboard with analytics charts, data tables, user management, and responsive sidebar.

- Integrated Chart.js for live-updating analytics graphs and KPI displays
- Built collapsible sidebar navigation with role-based section visibility
- Responsive layout that adapts cleanly from desktop to tablet screens

Stack: React, Chart.js, Tailwind CSS, Vercel

MK·V Netflix UI Clone github.com/HoneyCode24/Netflix-clone

Pixel-perfect Netflix interface clone with dynamic content rows, hover previews, and live API data.

- Integrated TMDB API for real movie/TV show data across all content rows
- Replicated Netflix's hover expand card animation and thumbnail preview behavior
- Demonstrates precision UI engineering — matching design at component level

Stack: React, CSS, Vercel

MK·VI Real-Time Weather App github.com/HoneyCode24/Weather-Web-App

Real-time weather application with city search, live API data, 5-day forecast, and dynamic UI.

- Consumed OpenWeather REST API with async/await and handled loading and error states
- Dynamic background and icon changes based on current weather conditions
- Clean, minimal UI with smooth transitions between city data updates

Stack: JavaScript, OpenWeather API, CSS, Vercel

EDUCATION

Self-Taught Frontend Developer · Independent 2023 – Present

- Learned HTML, CSS, JavaScript, React, and Next.js through documentation, projects, and real-world building
- Completed 6 deployed projects across restaurants, e-commerce, SaaS, and utility apps

- Actively studying system design, backend fundamentals, and TypeScript to expand full-stack capability

Higher Secondary Education · India

2023 – 2025

- Completed 12th grade while simultaneously building real web projects
- No formal computer science training — all technical skills are self-acquired

WHAT I OFFER

For Freelance Clients

- Landing pages from ₹8,000 · Business websites from ₹18,000 · Web apps from ₹35,000
- All projects delivered on time, deployed live, and fully responsive across devices
- Direct communication — no agencies, no middlemen, no templates

For Companies & Startups

- Strong React fundamentals with real project experience — not just tutorial builds
- Eye for design — I build things that look as good as they function
- Fast learner with a bias toward shipping — I figure things out and get things done
